

Environmental Policy

As a leader in the air services and travel industries, dnata recognises that environmental responsibility is core to our long-term business success.

We're committed to minimising the environmental impact of our operations across all our businesses and activities, including our supply chain.

We aim to meet the needs of our customers while using energy and resources efficiently, minimising waste, and operating our assets in the most environmentally responsible manner.

To deliver on this commitment, we will:

- develop management systems to improve our environmental performance
- comply with all applicable environmental regulations and obligations, as a minimum
- foster innovation and invest in eco-efficient technology, including ground equipment
- evaluate and monitor the environmental impact and performance of our operations
- set objectives and targets for continuous improvement, and put in place programmes to address our environmental impact and opportunities
- use energy, water, fuel and other resources efficiently, and minimise emissions and waste by rigorously applying processes, procedures and technology
- equip our employees with the knowledge and skills required to fulfil the commitments made in this policy
- publish information internally and externally on our environmental performance, including key performance indicators and progress against targets
- work with industry bodies, government agencies, business partners and other organisations to exchange knowledge and expertise
- support initiatives focused on responsible tourism and the protection of natural capital and biodiversity
